

Overview of Scope of Services Provided by Kleen Kraft Services for Food Processing Customers

This is an overview of the scope of services provided by Kleen Kraft Services for food processing, manufacturing, repackaging, and distribution customers.

A Kleen Kraft Route Sales Representative (RSR) visits your facility once per week on a regularly scheduled basis. The RSR collects soiled garments from bulk soil bins or lockers that Kleen Kraft provides. On the same visit, the RSR delivers onto racks one week's worth of clean and sanitized workwear for each worker. Your employees pick up their assigned clean garments and place them into their individually assigned locker within an 8-Bank Locker System that Kleen Kraft has installed for you.

Kleen Kraft also picks-up soiled walk-off floor mats, towels, and other sanitation products while delivering clean replacements with each weekly delivery.

A copy of most recently updated Kleen Kraft HACCP manual is available online at our website, www.kleenkraftservices.com. Kleen Kraft has been certified as a Hygienically Clean Food Safety provider by TRSA. In order to achieve certification, the Kleen Kraft plant was inspected, laundering processes were audited, management practices and records were reviewed, and garments were randomly tested for cleanliness by an independent third-party microbiological testing laboratory. We regularly test garments for bacterial contamination as part of our laundering process using an ATP testing system. Certification verifies and confirms best practices for clean and safe laundering of food processing garments and supplies.

When you work with Kleen Kraft as your uniform service provider, you can be confident that your garments will always be hygienically clean, repaired, and delivered on time.
